

- 1** Unique Accessory Rail makes this the only cable tray system that provides support for hanging additional cable trays, devices and accessories.
- 2** Pre-manufactured Turns eliminate labor-intensive cutting and allows for consistent bend radius.
- 3** Pre-manufactured T's & Cross Sections save onsite labor.
- 4** Optional Spanning Bar allows Mega Snake to span over ten (10) feet without deflection.
- 5** Snake Rail Built-in Suspension System requires no brackets and allows for random placement of hanging rods; also eliminates need for accessory hanging brackets and provides for a grounded tray connection; self-aligning splice kit.
- 6** Inline Patch Panel Interface attaches directly to the Accessory Rail minimizing the need for equipment racks.
- 7** Divider Grid snaps into position to form a divided pathway.
- 8** Power Module offers empty or pre-wired modules that attach directly to the accessory rail to provide power in client designated locations greatly reducing electrical construction costs.
