Snake Bus is a pre-manufactured power distribution system for access floors that delivers 50 Amps 3 phase 208/120 Volts providing more than 18 KW of power in an easy-to-install track and whip system. Snake Bus inherently provides 120 Volts phase to neutral, 208 Volts phase to phase and three phase configurations without ever having to change the track. Ideal for workstations, call centers, trading floors, casinos and data centers.

Fast - Traditional methods of hard wiring equipment are eliminated

Energy Conservation - Operates within the disciplines of the CA Energy Standard Title 24, as well as similar standards throughout the US and world

Flexible - Installations, adds, moves and changes are easily done with the Snake Whips (tap offs).

Powerful - Snake Bus delivers 50 Amp 3-Phase 208 Volt providing a nominal 18 KW of power.

Smart - Active modules monitor current digitally and are displayed locally or on an IP addressable device for direct connection to BMS

Functional - Provides both the equipment and isolated ground in one single system

Sleek - Snake Bus' slim profile fits in a space less than 2 ½ inches in height allowing for proper airflow under an access floor

4.8 KW Power Distribution System for Access Floors

Snake Tray is pleased to announce Snake Connect, its newest power distribution system for access floors. Snake Connect provides a complete line of 20 Amp modular wiring devices for raised floor applications. The ease of use and plug-n-play circular multi-pin connector provides fast installation, easy reconfiguration or relocation of power services and significant labor savings over conventional pipe and wire and other installations. The connectors are factory assembled and have a positive collar to ensure secure and safe connection. Snake Tray also manufactures a series of floor boxes, furniture interface modules and junction boxes to compliment the system.

- Plug-n-play connectors speed up installations
- Reconfigurations and relocations can be done instantly
- Electrical and datacom configurations can be easily modified
- Round connector design can easily pass through circular openings
- Floor boxes and furniture interface modules available to complete the system
- Junction boxes are available to facilitate a wide variety of cabling typographies

Manufactured Wiring Devices In-Floor Reception Stations

Snake Tray designs and builds a series of manufactured wiring systems that give contractors the convenience and speed to complete installations on time and under budget. These devices are ideal for general office environments, trading floors, command and control centers, data centers and hospitality build outs to name a few.

- Eliminates field fabrication
- Designed at the engineering level for optimum coordination during construction
- Factory tested for continuity and circuit integrity
- Listed to UL 183

Snake Tray manufactures a series of in-floor power and data distribution reception stations to conveniently deliver power where needed.

- Modern textured powder coat finishes to compliment any architectural design
- Wide variety of models are available to meet emerging technologies
- Listed to UL 514A

THE SNAKE TRAY ADVANTAGE

Snake Tray has revolutionized cable management, power distribution and enclosures with a variety of innovative

products designed to install quickly, reduce labor and materials costs, and significantly drive down the total cost

of construction. All of our products are made in the USA and stocked

throughout the USA to ship on time for our customers. Our engineers and

sales team stand ready to assist you with take offs, bill of materials and product solutions. Call us at 800-308-

6788 to discuss your next project.
